- 1. Skip-late petition article-Skip came to ask to have article on this town meeting warrant. Board said it was past the date and didn't want to start something where others might do the same with late articles, especially large budget item requests and the timetable for town meeting. TM said your petition is legal has enough signatures and will put on a town election like in November and do a referendum with a hearing. Evelyn said money if approved at town meeting doesn't get given to organizations until late August or September when tax money comes in. If it is after July when INH starts maybe you will have some good information during the referendum hearing. Skip was OK with that.**
- 2. Harbor Committee recommendations-Evelyn ran through the minutes. Discussed the recent boat aground incident with the Mark Nevells boat and doing something with derelict boats and also the issue with mooring tackle and inspections. Mentioned how hard it is to get someone like Buster to do moorings, or diving doesn't always show wear on bottom chain in block. Evelyn mentioned HC interested in doing an aquaculture map. Evelyn asked about boat pump. TM said**

board already approved the boat pump to get that when Dana goes to Bangor. One of the recommendations from the HC was doing a monthly permit fee structure to accommodate urchin dealers or other fishing species. Board discussed fees.
